JUNIOR SOFTWARE DEVELOPER

Programming | Database Management | Agile Trained |

- Results-oriented student of Software Engineering Technology-Artificial Intelligence Advanced Diploma, with applied project experience in full-stack development and database management.
- Demonstrated skill in object-oriented programming and user-oriented design.
- Highly skilled problem-solver with strong analytical skills.
- Team-oriented mindset that contributes to task productivity through excellent time management.
- Fluent in English; uses strong communication skills to support clients and effectively relay technical solutions to non-technical personnel.

TECHNICAL SKILLS

Programming:	Java, SQL, C#, JavaScript, HTML/CSS, Python
Frameworks & Libraries:	React, Express, .Net, Node.js, MongoDB
Operating Systems:	Unix, Linux, Windows
Development Tools:	Git, Visual Studio Code, Eclipse
Other Tools:	MS Office, Adobe Creative Suite

EDUCATION

Software Engineering Technology-Artificial Intelligence (Co-op) Advanced Diploma

Sept. 2024 - Present

Centennial College, Toronto, ON

GPA: 3.98/4.50

Key Courses: AI system and designs | Java Programming | Web Interface Design| Software Engineering Requirements | Database Concepts (SQL) | Client-Side Web Development | C# Programming

SELECT ACADEMIC PROJECTS

Smart Task Board App | Software Engineering Requirements

- Led a 5-member team using Agile (SCRUM) to design and prototype a smart task management application.
- Coordinated sprint planning, task assignments, and progress tracking through a team collaboration tool.
- Directed the creation of case diagrams, class models, and behavioral diagrams to capture system requirements.
- Oversaw technical review sessions, ensuring project deliverables met quality and timeline goals.

League of Legends SQL Database Project | Introduction to Database Concepts

- Directed a 3-member team database project, managing task distribution and project milestones.
- Designed and validated the Entity-Relationship Diagram (ERD) for a database of 50 champions.
- Supervised development of SQL scripts for table creation, relationships, and role-based access control.
- Delivered a final presentation and demonstration of queries, reports, and user permissions to the class.
